1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claim 53 has been cancelled.

Authorization for this examiner's amendment was given in a telephone interview with Edmund Sease on 12 February 2004.

2. The drawing figures filed 5 June 2002 do not meet the standard of 37 CFR 1.84. The figure numbers are too small, as are legends in at least figures 20 and 21. Some of the figures and parts of some the figures appear to be too dark to reproduce clearly, such as figures 1, 9, 18A, 18B, 22-24, 27 and 28. Correction is needed.

3. The following is an examiner's statement of reasons for allowance:

The art does not teach or suggest the placement of the detector in a system having a planar array of containers at a distance of at least about 10 times the diameter of the containers in the array. The claimed placement provides a solution to a problem of scattering by the container walls; the art does not teach or suggest this solution to that problem.
